Re: "A Job well done"!

Dear Sir,

Through my many years of being a Safety Engineer, I have worked with the Best of the Best. I am please to take this brief moment to tell you, that as being the Night Safety Engineer, at the Boeing Delta IV Project (Decatur AL.), I believe I can now add your Company to this same Category. Your Team has not only shown great Craftsmanship, but also, unsurpassed Leadership in the field of Safety.

Since the day, I enter the gates of this Project, I have been quite satisfied with your Night Shifts', Attitude, Skills, and Team efforts. Your Night Management has never shown any hint of compromising safety, but rather, they have promoted it every step of the way.

I would like to give a special recognition to your associate, **Carley Capps**. His knowledge and experience has helped this Project achieve great success, as he continues to do so. His leadership skills and proactive nature, not only makes him an asset to your Company, but also, enhances this Projects ultimate goal...To build this plant efficiently and safely.

More recently, McAbee associate, **Kevin Ship**, has also come on board as a positive influence to this Project. He has also shown the same great ability to balance such a busy schedule, as well as having a sincere approach to all safety matters. He and Carley, both, deserve not only my personal thanks, for, "a job well done", but also, the thanks of all who have the pleasure of working with such a Professional Team.

As Boeing personnel begin to overlap our process, in the near future, I see only positive results, for your Team has shown the ability to work well with others and set the pace for a strong Safety environment.

Thank you, ever so much, for making our Site a better place, by sending your very Best.

Sincerely,

Ginda L. Young
