November 16, 1981

Mr. Leroy McAbee  
McAbee Construction Co.  
P. O. Drawer 1460  
Tuscaloosa, AL 35403

Dear Mr. McAbee:

In regard to the recent shutdown at Alabama Kraft (November 2-12, 1981), I want to express my gratitude for the work performed by Don Tucker, Larry Casey, and the McAbee work force.

Special recognition should be given to Danny Mills and Harold Snipes and their crews for the job done on the 1st Stage Washer. I would also like to recognize Gary Herring and his iron worker crew for their dedication on the barking drum infeed chutes. The barking drum job could very well have been a complete disaster without the all-out efforts of the day crew.

The chip bin, dandy roll, saltcake system, and solvos revisions also ran very smoothly.

In all, I was very impressed with the supervisory crew assembled by McAbee for the shutdown. If I can possibly be of any assistance in future recommendations for McAbee Construction, please feel free to contact me.

Sincerely,

A handwritten signature in cursive script, reading "Gene Trammell", is written over the typed name.

Gene Trammell  
Project Engineer
